Semester	Instructor	Course Code	Q8 - What contributed most to your learning in this course?	Q9 - Did anything interfere with your learning in this course? If so, explain.	Q3 - What suggestions or recommendations do you think would help your instructor...
Fall 2022	Aditya Mankar	CECS274 04	Detailed explanations of how to do the lab assignments.	N/A	N/A
Fall 2022	Aditya Mankar	CECS274 04	I feel I learned more from this lab than the professor of the main course. The lecture material of the main class didn't help me grasp it but going to the lab did a much better job of that. I learned a lot through going through a simplified version of the skeleton code and encouragement of using online sources or our own version of solving the problem. This made the programming problems easier to tackle and less intimidating.	The only thing I think was an issue was with how the main class was misaligning with the content being taught in the lab. This seems to be more of an issue of the main class than the lab, but it made it difficult to keep on top of the professor's lectures of the main class with the lab section.	Use the Canvas files tab and upload your own version of the skeleton code if you make them, rather than email us the code. The skeleton code helps a lot for the class and I think having it within the Canvas course for this section keeps everything organized and easier to learn. It's especially helpful when students may miss a class and need to refer to any material that they missed out on.
Fall 2022	Aditya Mankar	CECS274 04	In-Class presentation of material helped to grasp certain ways to understand algorithms.	The little incorporation of Lecture material in Lab activities and assignments severely impacted my ability to grasp important material from important course topics (from the Lecture). Because of this, Lecture quizzes were almost impossible as there was little understanding of topic implementation.	Cooperate with the Lecture teacher to have an understanding of the assignments that incorporates major elements of the course.
Fall 2022	Aditya Mankar	CECS274 04	Lab work	The teacher's accent	Try to speak less without the accent and display more examples of what you're trying to get the students to do on their own
Fall 2022	Aditya Mankar	CECS274 04	Teacher helped us if we get stuck on parts of an assignment	No	update grades more often to give more time for questions
Fall 2022	Aditya Mankar	CECS274 04	The actual coding and building the skeleton code for several data structures helped me understand the course. Also, the drawings of how each data structures are accessed and used were helpful during lab hours. Also, letting the student understand how the code works rather than just mindlessly writing a code helps.	None.	None.
Fall 2022	Aditya Mankar	CECS274 04	The extra examples he gave were most helpful.	Mr. Mankar is a new professor. With time I'm sure he will improve on explaining the concepts to students, but his inexperience was a little troubling at first.	I would recommend he continue with the extra examples and encouraging the students to figure things out without too much guidance.
Fall 2022	Aditya Mankar	CECS274 04	The instructor and my use of the internet.	N/A	Nothing really.
Fall 2022	Aditya Mankar	CECS274 04	This class effectively carried the entire course.	N/A	Just keep doing what you're doing!
Fall 2022	Aditya Mankar	CECS274 04	nice teacher, taught us about the course as well as real life experiences	non-mandatory class made me less willing to go sometimes	N/A
Fall 2022	N/A	CECS274 04	N/A	N/A	N/A
Fall 2022	N/A	CECS274 04	N/A	N/A	N/A

Student Comments

What contributed most to your learning in this course?

- The assistant t help explain the problem in the code.
- I would say it would be helping understand what was being asked of us in the assignment.
- Asking questions and completing assignments.
- Aditya Mankar.

Did anything interfere with your learning in this course? If so, explain.

- Nothing interfered.
- N/A.
- Nope.

What suggestions or recommendations do you think would help your instructor prepare to teach this course again?

- I have no suggestions.
- I like how students are encouraged to ask questions. Perhaps in the middle of the class, ask the students if they would like a hint or a small lecture to help guide them during the lab?
- Can't think of any. Your approach and way you handle the class is super chill and manageable. I appreciate your style of teaching. I hope you achieve whatever it is you're striving for. :>

Student Comments

What contributed most to your learning in this course?

- He would answer every one of my questions proficiently and would always be supportive of my endeavors in my lab.
- the labs and notes the TA provided
- TA showed me that I was overcoding in python
- His help and knowledge of the industry made doing the labs easy and helped put an end goal in sight.
- Very detailed and thorough explanations given for every lab. Even though he was just a TA he always went out of his way to create lessons that helped us understand the weekly content.
- He explained the lab pretty well
- The explanation of the problem and solution in great detail.

Did anything interfere with your learning in this course? If so, explain.

- He did cancel the lab section sometimes, but that's understandable since we all have lives outside of our university life. Other than that, he's terrific.
- no
- N/A
- N/A nothing interfered with learning
- Nothing interfered.
- nothing
- N/A

What suggestions or recommendations do you think would help your instructor prepare to teach this course again?

- To encourage others to talk about the lab when they all feel confused or may possibly have the same questions.
- being able to have the option to not work in groups
- Make it clear whether lab assignments will be in groups or individual. Instead of Mon-Wed window to complete these assignments, should be Mon-Fri
- N/A I think everything is being done amazingly in this class
- Everything was really great!
- he is perfect for this job. hire him again in the next sem
- N/A
